IoT4Ag

The Internet of Things for Precision Agriculture
a U.S. NSF Engineering Research Center

Modern Tech Apps in Agriculture

Faik Kerem Ors, Rumeysa Gorgulu, Kristin Korcha

Penn University of Pennsylvania | Purdue University | University of California Merced | UF University of Florida | ASU Arizona State University | NSF NSF ERC

LoRaWAN – Long Range Wide Area Network

LoRaWAN – Long Range Wide Area Network

- The internet runs on a set of rules called protocols
  - Different devices should use the same protocol (speak the same language) to be able to communicate with each other

Penn University of Pennsylvania | Purdue University | University of California Merced | UF University of Florida | ASU Arizona State University | NSF NSF ERC

LoRaWAN – Long Range Wide Area Network

- The internet runs on a set of rules called protocols
  - Different devices should use the same protocol (speak the same language) to be able to communicate with each other

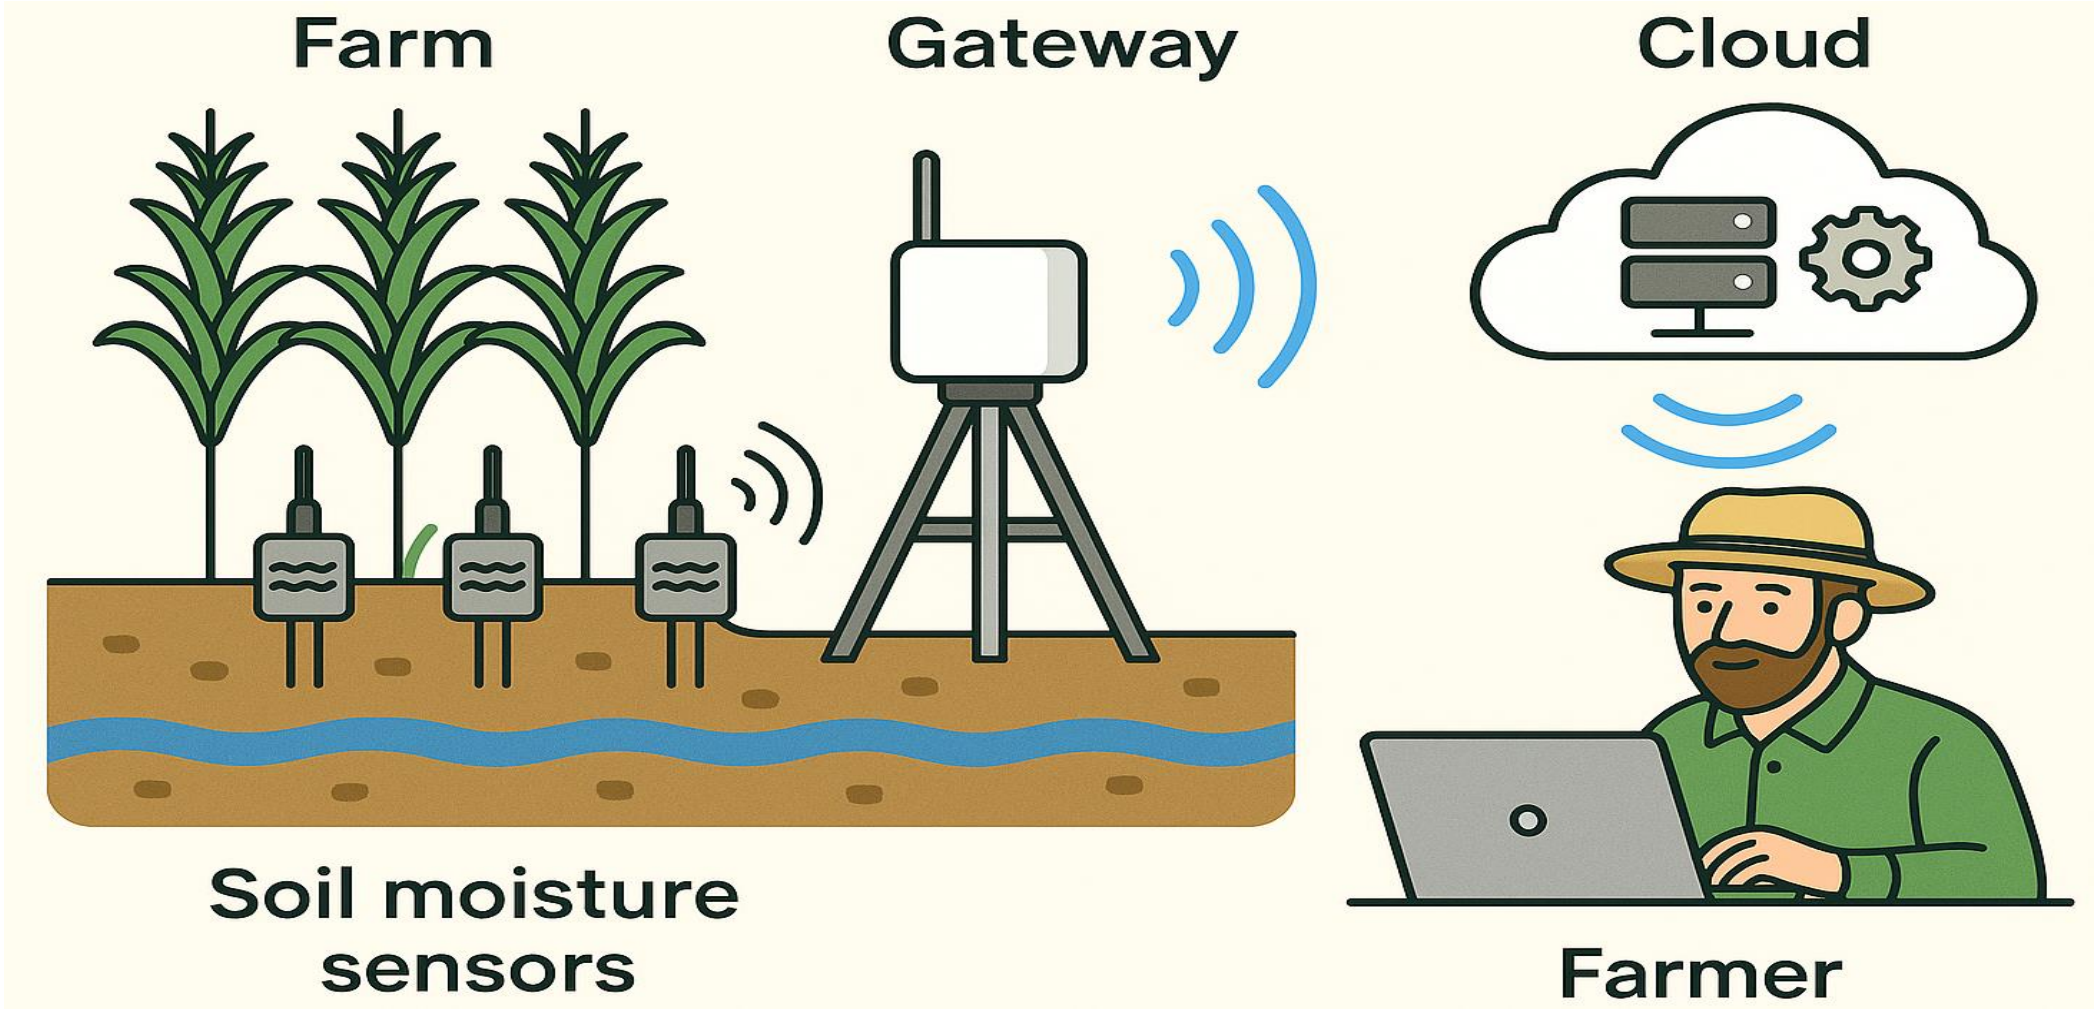

- IoT
  - Tiny and low-power
  - Cannot use the same protocols as regular devices

Penn University of Pennsylvania | Purdue University | University of California Merced | UF University of Florida | ASU Arizona State University | NSF NSF ERC

LoRaWAN – Long Range Wide Area Network

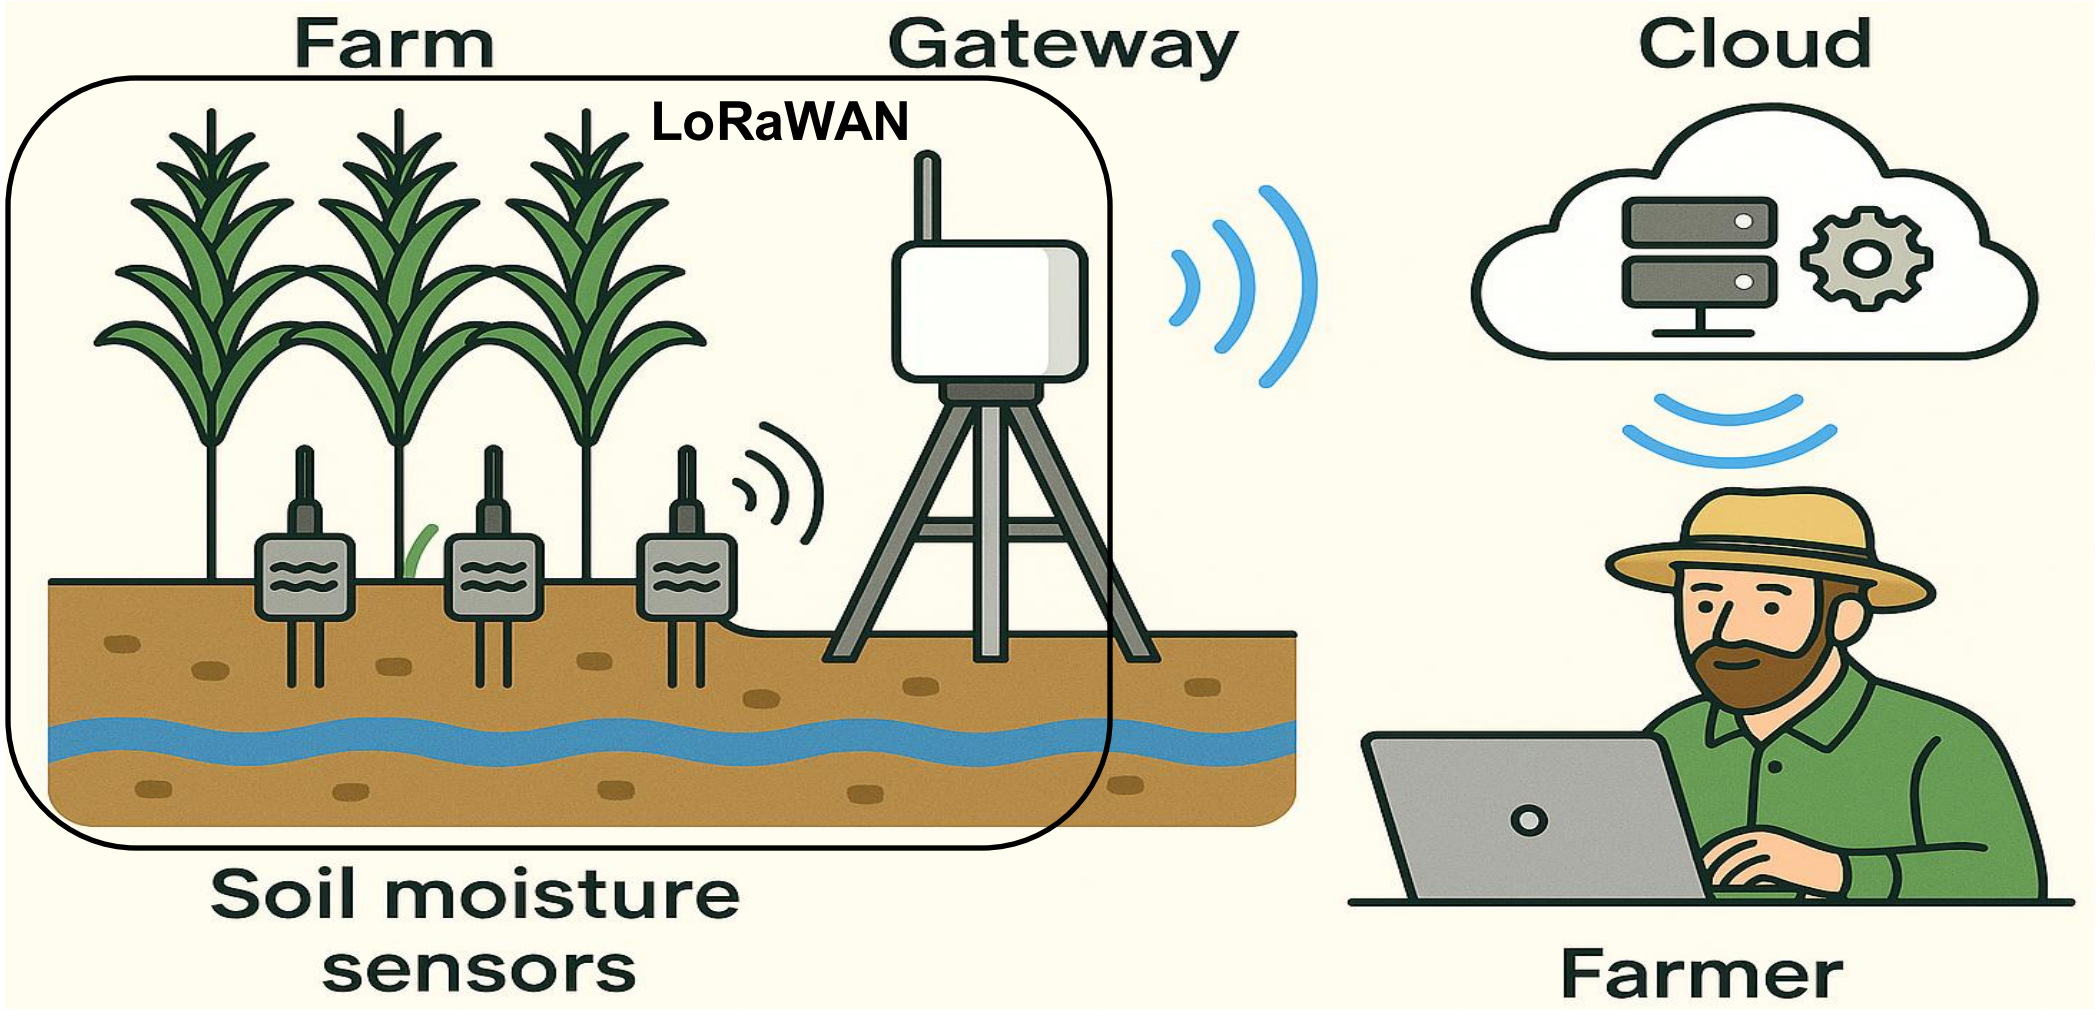

- The internet runs on a set of rules called protocols
  - Different devices should use the same protocol (speak the same language) to be able to communicate with each other
- IoT
  - Tiny and low-power
  - Cannot use the same protocols as regular devices
- LoRaWAN
  - Connects many sensors
  - Low power consumption
  - Long range transmission
